

Thank you — here is what you just downloaded.

Free, and it stays free. No email wall, no trial, and nothing switched off inside the file. It is built for shop and small store owners.

WHAT IS IN THIS FOLDER

Reorder-Point-Calculator-Free.xlsx	The workbook.
Reorder Point Calculator-Guide.pdf	How it works, and the one rule that matters.
Read-Me-First.pdf	This page.

GETTING STARTED

- 01 On Items, list each product with sales per day and the supplier's lead time.
- 02 Enter how many days of buffer you want, what is on hand and what is on order.
- 03 Read Order Now. Anything marked ORDER needs buying today.
- 04 SKUs are stored as text, so codes starting with a zero keep their zero.

COMING SOON — INVENTORY TRACKER

This free workbook is complete for what it does. A paid edition is being finished for the work that sits beyond it:

- Suppliers and purchase orders, not just quantities
- Stock movements in and out with a running balance
- Stock value and a slow-mover report

No date promised and no list to join. It appears on the site when it is ready.

Licence. Use it for anything, at work or at home, client work included — change it, rename it, build it into your own process. You may not resell it as a template of your own. **Plain .xlsx:** no macros, no add-ins; opens in Excel, Google Sheets, Numbers and LibreOffice.

Found something it gets wrong? Tell me — that is how the next version gets better.
